

Graduation Project – 10-Minute Project Pitch Video

Each team is required to submit a **10-minute project pitch video** that clearly explains your graduation project.

organize your presentation using the following structure:

1. Project Overview

Briefly introduce your project:

- Project name
 - Explain your project in **one clear sentence**
-

2. Problem Statement

Explain:

- What problem are you solving?
 - Who experiences this problem?
 - Why is it important to solve?
-

3. Proposed Solution

Describe:

- How does your project solve the problem?
 - What are the main features of your solution?
-

4. User Workflow

Explain the complete user journey from start to finish.

For example:

- How does the user start?
- What actions does the user perform?
- What happens inside the system?
- What is the final result?

The workflow should be explained step by step.

5. AI Architecture

Explain the AI part of your project:

- Why does your project need AI?
 - What is the role of the LLM?
 - Does your project use RAG? If yes, why?
 - Does your project use AI Agents? If yes, what is their responsibility?
-

6. Technical Architecture

Briefly explain your technology stack:

- Frontend
 - Backend
 - Database
 - AI Components
 - External APIs
 - Cloud / Deployment
-

7. MVP Scope

explain:

- What features will be completed?
 - What will be demonstrated in the final presentation?
 - Which features are planned for future phases?
-

8. Final Summary

Finish your presentation by answering these two questions:

1. **Why is AI essential to your project?**
 2. **Explain your entire project in 30 seconds.**
-

Video Guidelines

- Maximum duration: **10 minutes**.
- Keep your explanation clear, simple, and well organized.
- Use slides or diagrams if they help explain your idea.
- Do **not** read directly from the proposal.
- Focus on explaining the project idea, workflow, and AI design rather than implementation details or code.
